RYNAN AGRICULTURE PRODUCTS

RYNAN Smart fertilizers is a controlled release fertilizer that is specially formulated with a patent nano-coating technology. Nutrients are encapsulated within each fertilizer granule, with controlled rates of release to suit crop's requirements.

This means we can improve nutrient efficiencies by using lesser dosages of fertilizers for each growing season. Only a single application is required at the start of each season, thus helping farmers save on production costs and reduce negative environmental impacts.

HERBS & LEAFY VEGETABLES

RYNAN® NPK 27-08-08+TE (2% HUMIC)

Specially formulated for the cultivation of green leafy vegetables such as Basil, Thyme, Bok Choy, Spinach, etc.
